WORK EXPERIENCE

SMART INTERNZ

January 2024 – July 2024

Cyber Security Intern

Remote

- The basics of ethical hacking, including different types of hacking
- How to use Linux for ethical hacking, including popular tools like Kali Linux and Ubuntu
- The different phases of hacking, including Reconnaissance, Scanning, and Exploitation
- How to perform advanced hacking techniques, including Web Application Hacking & Social Engg.
- How to protect against common cyber attacks, including Denial-Of-Service attacks & Malware infections
- How to write ethical hacking reports and communicate your findings to clients

APSSDC

May 2023 – July 2023

Gamification

Remote

- Using Build-Box tool for developing 2D Games

UDEMY

January 2025 –

AI ENGINEERING

Remote

- I'm learning the Python programming, Data Science essentials, Mathematics, Probability & statistics for ML
- I'm exploring Advanced ML concepts, Model Tuning, & Optimization
- Exploring the concepts like Neural Networking, Deep Learning, CNN, RNN, & NLP
- Exploring the topics like Transfer Learning, Domain Adaptation & Fine-Tuning Techniques and more

UDEMY

october 2024 –

Full Stack Development

Remote

- How to use and apply ChatGPT Generative Open AI Techniques in Full Stack Development.
- **Frontend Fundamentals** : By mastering HTML5, CSS3, and JavaScript
- **Backend Technologies** : I'll explore languages like Python.
- Grasp the principles of server-side logic, RESTful APIs, and data management.
- **Server-side Frameworks** : Mastering frameworks of Django and REST API frameworks
- **Database Management** : Learn how to work Databases effectively, in SQL Databases.
- Also, I will learn MySQL RDBMS concepts
- Exploring Authentication and security, Project Management, REST API Services & Performance Optimization

EDUCATION

JNTU-GV

December 2021 - July, 2024

Degree (Bachelor of Technology (B.Tech)),

Majors (Computer Science and Engineering)

Visakhapatnam,

Andhra Pradesh

PROJECTS

Book Locator

January 2024 – July 2024

- Using Indoor Positioning system created a book discovery system,
- Ideal as a backbone for digital twin systems and phygital interfaces

SKILLS

Programming Languages – Python, R, JavaScript, C++, Kotlin, PHP

Hacking Tools & Technologies – OSINT, CSEH, Wireshark Ninja, Nmap, Metasploit, etc

Tech Skills – Prompt Engineering by using [ChatGPT, Gemini ai, Deepseek, Copilot], HTML5, CSS3, Buildbox 2D

Frameworks – Volatility, Django, Flask, REST APIs

Databases – SQL, MySQL, MySQLi

Operating Systems – Windows, Linux & Mac OS, Android

Languages – English, Hindi, Telugu
